Chemical Safety Information

This document provides additional information concerning chemical safety information related to Globally Harmonized System (GHS) precautionary & hazard statements. To see the statement(s) associated with each listed precaution and hazard number code(s) see those respective links given below.

Links for GHS Statements

<table>

This document is a quick guide that provides Globally Harmonized System (GHS) information concerning chemical safety from the chemical Safety Data Sheets (SDS) we have on file. The information listed here is not comprehensive and subject to change as information contained in SDS’s are updated or changed. For more detailed information than what is given here read the associated SDS prior to using any chemical.
